INDICATION AND IMPORTANT SAFETY INFORMATION FOR DAYBUE

Indication

DAYBUE is indicated for the treatment of Rett syndrome in adults and pediatric patients 2 years of age and older.

Important Safety Information

• Warnings and Precautions

• **Diarrhea:** In a 12-week study and in long-term studies, 85% of patients treated with DAYBUE experienced diarrhea. In those treated with DAYBUE, 49% either had persistent diarrhea or recurrence after resolution despite dose interruptions, reductions, or concomitant antidiarrheal therapy. Diarrhea severity was mild or moderate in 96% of cases. In the 12-week study, antidiarrheal medication was used in 51% of patients treated with DAYBUE.

Advise patients to stop laxatives before starting DAYBUE. If diarrhea occurs, patients should notify their healthcare provider, consider starting antidiarrheal treatment, and monitor hydration status and increase oral fluids, if needed. Interrupt, reduce dose, or discontinue DAYBUE if severe diarrhea occurs or if dehydration is suspected.

• **Vomiting:** In a 12-week study, vomiting occurred in 29% of patients treated with DAYBUE and in 12% of patients who received placebo.

Patients with Rett syndrome are at risk for aspiration and aspiration pneumonia. Aspiration and aspiration pneumonia have been reported following vomiting in patients being treated with DAYBUE. Interrupt, reduce dose, or discontinue DAYBUE if vomiting is severe or occurs despite medical management.

- Weight Loss: In the 12-week study, 12% of patients treated with DAYBUE experienced weight loss of greater than 7% from baseline, compared to 4% of patients who received placebo. In long-term studies, 2.2% of patients discontinued treatment with DAYBUE due to weight loss. Monitor weight and interrupt, reduce dose, or discontinue DAYBUE if significant weight loss occurs.
- Adverse Reactions: The common adverse reactions (≥5% for DAYBUE-treated patients and at least 2% greater than in placebo) reported in the 12-week study were diarrhea (82% vs 20%), vomiting (29% vs 12%), fever (9% vs 4%), seizure (9% vs 6%), anxiety (8% vs 1%), decreased appetite (8% vs 2%), fatigue (8% vs 2%), and nasopharyngitis (5% vs 1%).

Drug Interactions: Effect of DAYBUE on other Drugs

- DAYBUE is a weak CYP3A4 inhibitor; therefore, plasma concentrations of CYP3A4 substrates may be increased if given concomitantly with DAYBUE. Closely monitor when DAYBUE is used in combination with orally administered CYP3A4 sensitive substrates for which a small change in substrate plasma concentration may lead to serious toxicities.
- Plasma concentrations of OATP1B1 and OATP1B3 substrates may be increased if given concomitantly with DAYBUE. Avoid the concomitant use of DAYBUE with OATP1B1 and OATP1B3 substrates for which a small change in substrate plasma concentration may lead to serious toxicities.

Use in Specific Population: Renal Impairment

• DAYBUE is not recommended for patients with severe renal impairment.

DAYBUE is available as an oral solution (200mg/mL).

Please read the full Prescribing Information, also available at DAYBUEhcp.com.

and Important Safety Information

<u>Acadia</u> <u>Connect</u> <u>Overview</u>

Benefits Investigation

<u>Denials &</u> <u>Appeals</u>

Acadia Connect is a patient and family support program that connects you, your patients, and their family members with dedicated services throughout the treatment journey, before and after patients have been prescribed DAYBUE.

Acadia Connect consists of a dedicated, experienced support team:

The Patient Access Manager offers education and support to assist you and your office with accessing DAYBUE for your patients.

- Provides information to minimize access barriers and coverage delays for DAYBUE
- Assists with navigating the prior authorization, appeals, and reauthorization by providing education on plan-specific coverage policies, requirements, and processes

Patient Access Manager

• Continuously updates you on your patient's coverage status, potential financial assistance options, and any interruptions in their treatment

Nurse Care

Coordinator

The Nurse Care Coordinator provides your office staff with important information to help your patients start and continue treatment with DAYBUE.

- Benefits investigations and access support
- Information on potential financial assistance options
- Coordination of medication delivery to patients

Family Support

Educator

The Family Support Educator offers education and support to help patients and caregivers navigate treatment with DAYBUE.

- Helps caregivers learn more about the disease state and potential treatment with DAYBUE
- Provides in-person or virtual one-on-one education
- Answers questions about insurance coverage
- Helps caregivers and patients prepare for treatment with DAYBUE, including education on managing side effects
- Keeps caregivers informed on new learning resources, events, and more
- Connects caregivers with others in the community

Our exclusive specialty pharmacy, AnovoRx, will process and fill DAYBUE prescriptions and have clinical pharmacists available 24/7

Indication and Important Safety Information

<u>Acadia</u> <u>Connect</u> <u>Overview</u>

The patient's health plan may require verification of medical necessity for approval to initiate treatment with DAYBUE.

This guide will walk you through

- The process you and your patients' caregivers may need to follow to obtain insurance coverage for DAYBUE
- The Acadia Connect resources available to assist you at each step

Additional support and resources are available through Acadia Connect to help patients continue treatment with DAYBUE, as well as patient assistance programs.

From starting DAYBUE to providing ongoing support, our team is here to help.

Investigation

Necessity

Denials & Appeals

Financial

Assistance

Insurance

Acadia Connect will provide insurance support services to help your patients obtain coverage for DAYBUE.

Financial Assistance

Eligible patients with commercial insurance may pay as little as \$0 per month for DAYBUE after being automatically enrolled in the Acadia Connect Commercial Copay Program.* If your patient does not have insurance or DAYBUE is not covered by their insurance plan, we can provide potential financial assistance options, such as the Acadia Connect Patient Assistance Program.[†]

Prescription

We partner with AnovoRx, our exclusive specialty pharmacy, to process and fill DAYBUE prescriptions. This process helps your patients start therapy as soon as possible and regularly receive their prescriptions on time.

Delivery

Once AnovoRx finalizes your patient's prescription details, they will schedule the delivery to the location most convenient for your patient's family or caregiver. Acadia Connect will also contact the caregiver regularly to coordinate shipping your patient's refills.

Ongoing Support

Acadia Connect will be in touch regularly with the caregiver to check in and assist them with any changes they may be experiencing with the patient's insurance, financial situation, or prescription delivery. Visit AcadiaConnect.com to learn more about our personalized support program, designed to help meet the needs of your patients taking DAYBUE

*Terms, conditions, and program maximums apply. This program is not open to patients receiving prescription reimbursement under any federal, state, or government-funded healthcare program. Not valid where prohibited by law.

[†]Terms and conditions apply. An application is required and is subject to review. Submission of an application does not guarantee approval for the program. While Acadia makes every effort to grant aid when needed and appropriate, the program is limited in available resources and may be modified or discontinued at any time, without further notice.

6

Indication and Important Safety Information

Benefits Investigation

The first step to obtaining coverage for your patient is a BI with the patient's health plan, conducted by Acadia Connect. The BI will determine whether the patient qualifies for treatment with DAYBUE and identifies any potential limitations.

A BI helps to answer questions about your patient's coverage, such as:

- Is DAYBUE covered by their insurance?
- What additional forms or letters are required to obtain coverage?
- What are the expected patient out-of-pocket costs?

Indication and Important Safety Information

<u>Acadia</u> <u>Connect</u> <u>Overview</u>

Investigation

Assistance

After completing a benefits investigation (BI), you may be required to submit a PA form, letter of medical necessity, or both, as required by the insurance plan. Acadia Connect will provide information to help identify the correct documentation as needed.

Determine which documents you will need to submit to obtain coverage

- Please note that submitting a letter of medical necessity in advance of a PA can help expedite the approval process
- If submitting a PA form, refer to the <u>Acadia Connect Prior Authorization</u> <u>Checklist</u> to ensure all necessary criteria is included with the PA

Ensure all necessary insurance information is included in both documents, as required by the insurance plan, to avoid rejections

PA

A PA is a formal request for coverage of a specific treatment required for the patient, and can be accepted, rejected, or denied by the insurance plan

- If rejected, resubmit the PA with the correct or missing information
- If denied, begin the appeals process with the option to send a letter of appeal

NOTE: The health plan may have its own PA form you are required to submit.

Medical Necessity

A letter of medical necessity documents the need of a medication for your patient to obtain coverage through their health insurance plan

The request for coverage can be accepted, rejected, or denied by the insurance plan

- If rejected, provide the correct or missing information
- If denied, begin the appeals process with the option to send a letter of appeal and additional information

Both a PA and letter of medical necessity should include information about the patient's medical history, symptoms, and relevant test results

See the next page for more information on how to complete these documents

Benefits Investigation

Appeals

Resources

If a PA is denied for DAYBUE, Patient Access Managers can provide guidance and information to assist with the appeals process

Coverage is denied when the insurance company decides that your patient does not meet the requirements for approval, based on the patient's medical history and documentation provided. The following factors can also contribute to the denial decision:

- Administrative errors on the documents
- Insufficient information regarding medical necessity and patient treatment history
- Incorrect submission process and/or form

If a request is denied, you have the right to appeal the decision. Each insurance plan has its own pathway in place for appealing a coverage denial, so be sure to check with the plan before submitting an appeal to confirm the denial reason(s) and submission requirements.

Initiating the Appeal

Step 3

To start the appeals process, you will need to submit an:

Appeal Letter

This letter provides additional information regarding your patient, even if you already submitted a letter of medical necessity during the prior authorization (PA) process. This includes clinical information the insurance plan may require based on their reason(s) for denial.

acadia

A caregiver may also submit a voice of the patient letter of appeal, an appeal letter written by the caregiver explaining why DAYBUE is needed for the patient's treatment.

If your initial coverage request is unsuccessful, healthcare providers and/or caregivers may write letters to the health insurance plan to appeal the coverage denial of a medication.

These letters should include

- The reason(s) for denial
- Why the coverage denial should be overturned

Visit the **Resources** tab to view samples of these letters that may help with your patient's appeal process.

Always check to see if the patient's health insurance has its own template for you to follow when submitting an appeal letter.

Phone: 1-844-737-2223 Fax: 1-888-385-2748

\triangleright

Indication and Important Safety Information

<u>Acadia</u> <u>Connect</u> <u>Overview</u>

Investigation

<u>Denials &</u> <u>Appeals</u>

The Appeal Process

When submitting an appeal, it is important to

- Keep track of dates, methods of correspondence, and reference numbers
- Confirm that any documentation you sent was received (eg, letter of medical necessity) and when
- Record the names of insurance contacts and reviewers with whom you spoke

There are varying levels of appeals, depending on the state and insurance plan.

Some plans may require a member appeal. There may be an option for the member to designate their healthcare provider (HCP) to appeal on the member's behalf

First Level Appeal: Peer-to-Peer Review

After reviewing the reason(s) for denial, you may contact the patient's insurance plan and request reconsideration. You may also request a **peer-to-peer review** conducted by a medical reviewer in order to challenge the decision. The purpose of the first level appeal is to prove that your prior authorization (PA) request meets the insurance plan's requirements and was incorrectly rejected.

Second Level Appeal: Medical Director Review

If your first level appeal is denied, you can request a separate **medical director** to review and reassess the need for approval. The goal of the second level appeal is to further prove that your request should be approved within the insurance plan's coverage guidelines. If needed, you may consider filing a complaint with the state's insurance commissioner.

Independent External Review

If your previous appeals are denied, you may request an external review conducted by an **independent third party** who will review the request and make a final coverage decision. This is done in collaboration with a board-certified physician in the same specialty as the patient's physician.

To achieve a successful resolution, be sure to:

1. Provide all required information and documentation

2. Use language that illustrates why treatment is medically necessary

3. Be aware of common reasons that could lead to a PA denial (see page 9 for reminders of what to include)

Acadia Connect is here to support you through the coverage approval process. For questions, please contact your Patient Access Manager

<u>Acadia</u> <u>Connect</u> <u>Overview</u>

Investigation

If your patient has already been treated with DAYBUE and requires further authorization to continue treatment, a reauthorization may be necessary.

Helpful Tips for Reauthorization Requests

- 1. Ensure your reauthorization request includes all necessary information required by the insurance plan.
 - Refer to the <u>Prior Authorization Checklist</u> for a list of potential criteria that may be required in your request
- 2. Provide detailed notes on the patient's experience with DAYBUE and any relevant clinical information that may prove the effectiveness of treatment for your patient.
 - Consider asking their caregiver to record daily observations of any changes or improvements experienced while on DAYBUE, which may be relevant later for the reauthorization appeal
- 3. Keep in mind that insurance plans may require different information for reauthorization requests. Remember to confirm all required information with the insurance plan provider before submitting the request.

If your reauthorization is denied...

Click here to access the <u>Sample Reauthorization Letter of Appeal</u> to help you draft an accurate and complete letter of appeal to your patient's insurance company

Always check to see if the patient's health insurance plan has its own template for you to follow when submitting a reauthorization appeal.

When submitting this appeal, be sure to include the reason(s) your reauthorization was previously denied and why they are invalid

Always include your denial's reference number and the specific type of appeal you are requesting (**See the previous page** for full descriptions of each type of appeal review)

Step 4

Indication and Important <u>Safety</u> **Information**

<u>Overview</u>

Utilizing Financial Assistance Options

Acadia Connect offers several programs and support options to help families and caregivers access DAYBUE for their loved one.

Acadia Connect Financial Programs:

Commercial Copay Program

Through Acadia Connect, eligible commercially insured patients may pay as little as \$0 per month

Eligible patients with commercial insurance may pay as little as \$0 per month for DAYBUE after being automatically enrolled in the Acadia Connect Commercial Copay Program*

Patient Assistance Proarams

For patients who do not have insurance, or situations in which DAYBUE is not covered by their insurance plan, Acadia Connect can provide appropriate financial assistance options, such as the Acadia Connect Patient Assistance Program[†]

Acadia Connect can check to see if a patient qualifies, based on the program's eligibility criteria

Nurse Care Coordinator Support

Nurse Care Coordinators can connect eligible patients and caregivers to potential third-party resources that may help address financial concerns

*Terms, conditions, and program maximums apply. This program is not open to patients receiving prescription reimbursement under any federal, state, or government-funded healthcare program. Not valid where prohibited by law.

[†]Terms and conditions apply. An application is required and is subject to review. Submission of an application does not guarantee approval for the program. While Acadia makes every effort to grant aid when needed and appropriate, the program is limited in available resources and may be modified or discontinued at any time, without further notice.
